LinkedIn

GitHub

Delivering actionable insights through data analytics, customer intelligence, & AI-driven solutions to support business growth & strategic decision-making.

Education

- 2023 | **Master of Science in Data Science for Business**
University of Stirling, UK
- 2021 | **Bachelor of Technology in Electronics and Telecommunication**
Symbiosis Institute of Technology, Pune

Core Competencies

Data Analytics

Customer Insights & Analytics

Business Intelligence & Reporting

Predictive Analytics & Forecasting

Machine Learning

Natural Language Processing (NLP)

Data Visualization

Customer Segmentation

AI Solution Development

Technical Skills

Programming Languages: Python, SQL, R, C/C++, Bash, VBA

AI, ML & Data Science: Claude API, MCP (Model Context Protocol), LLM Agent Orchestration, RAG Pipelines, Hugging Face, Scikit-learn, XGBoost, Statsmodels

Business Intelligence & Visualization: Microsoft Power BI (DAX, Power Query), Tableau, QlikView, Simul8, Neo4j (Cypher), Matplotlib, Plotly, Altair

Data Processing & Analysis: NumPy, Pandas, MS Excel

Data Integration & APIs: REST API, Qualtrics API, CRM Integrations, Web Scraping

Profile Summary

- Leveraging nearly 3 years of experience in Data Analytics, Artificial Intelligence, Customer Analytics, and Business Intelligence to transform complex data into actionable insights and support data-driven business decisions.
- Delivered end-to-end analytics and AI solutions using Python, SQL, Power BI, NLP, REST APIs, and predictive modeling to automate workflows, enhance reporting, and optimize business performance.
- Delivered customer intelligence initiatives across UK-based organizations, including NLP models achieving 92% accuracy, interactive Power BI dashboards, and customer segmentation solutions that improved satisfaction, loyalty, and operational efficiency.
- Drove pragmatic AI adoption through LLMs, RAG pipelines, and AI-powered automation while aligning advanced technologies with practical business requirements to maximize impact.
- Earned the Employee of the Month award for identifying product demand patterns & recommending targeted promotional strategies that enhanced sales performance and customer experience.

Work Experience

June'24 – Jan'26 | **Customer Insights Analyst** | SSP Group, Liverpool, UK

- Built an end-to-end NLP text classification pipeline using Python and Qualtrics REST API to process 50,000+ survey responses, achieving 92% accuracy, reducing manual tagging effort by 30%, and saving 15 hours of manual effort.
- Developed and deployed 6 real-time Power BI dashboards using DAX and Power Query, enabling analysis of sales, product, geographic, customer satisfaction, complaint, and store-level KPI data through interactive visualizations.
- Modeled customer relationships in Neo4j using Cypher by integrating CRM, web analytics, & survey data, enabling customer segmentation that reduced churn by 8% and increased customer loyalty by 15%.
- Generated actionable customer and product insights through predictive analysis, improving customer satisfaction by 12% and supporting data-driven business decisions.
- Earned the Employee of the Month (2024) award for identifying high-demand products through customer behavior analysis and recommending targeted promotional strategies that contributed to a 20% increase in positive customer feedback and improved sales performance.

May'23 – Sep'23 | **Data Scientist** | Tuminds Social Media, Inverness, UK

- Analyzed 10,000+ operational records using Advanced Excel (Power Query, Pivot Tables) and statistical models to identify trends and process inefficiencies, enabling data-driven decisions that improved operational workflows and resource allocation.
- Developed and deployed 4 interactive Power BI dashboards to monitor KPIs, revenue trends, and operational metrics, automating weekly reporting and saving 15+ hours of manual analysis per week.
- Built a Python-based NLP sentiment analysis pipeline to analyze social media feedback and customer reviews, generating actionable marketing insights that increased social media engagement by 16%.

Dec'19 – June'20 | **Embedded Engineer** | Nuclear Power Corporation of India, Mumbai, India

- Engineered a 20-channel temperature monitoring system by integrating LTC2984 sensors with FPGA platforms, achieving 0.1°C measurement accuracy for high-precision monitoring.
- Improved measurement accuracy by 25% through the development of a multi-channel GUI and optimization of ADC noise filtering, enhancing overall system performance.

Projects

Bitcoin Price Forecasting & Trading Strategy | NumPy, XGBoost, Scikit-learn | May 2026 – Jun 2026

- Built an end-to-end ML pipeline using 4,280+ days of Bitcoin OHLCV data, training 8 models across Linear Regression, Random Forest, XGBoost, Classification, ARIMA (5,1,0), and K-Means for forecasting and market regime detection.
- Developed a multi-model trading signal framework requiring both Random Forest and XGBoost to exceed 55% confidence before trade execution, improving signal reliability.
- Implemented 5-fold TimeSeriesSplit walk-forward validation and backtested the strategy with position sizing and risk management, validating out-of-sample performance and benchmarking against a buy-and-hold approach.

Certifications

AI Engineer Agentic Track:
The complete Agent and MCP course (2026)

BCG- Data Science Job
Simulation (2025)

Google Data Analyst (2024)

Designing Highly Scalable
and Highly Available SQL
Databases (2023)

Product Sales Forecasting | Pandas, NumPy, Statsmodels (ARIMA, Holt's) | Mar 2026 – Apr 2026

- ⌚ Engineered lag features, rolling averages, and volatility metrics across 10 product categories, comparing Naïve Baseline, Holt's Exponential Smoothing, and ARIMA (1,1,1) models using MAPE on a held-out 6-month validation dataset.
- ⌚ Transformed complex spreadsheets into clean, analysis-ready datasets using Pandas, resolving misaligned headers, embedded metadata, sparse sales records, and inconsistent data structures to improve forecasting accuracy.

AI Job Fit Analyser | Scikit-learn, Pandas, Claude API | Dec 2025 – Mar 2026

- ⌚ Built an AI-powered job evaluation engine using TF-IDF cosine similarity and keyword matching to generate Overall Fit and Skills Match scores between resumes and job descriptions.
- ⌚ Automated end-to-end job sourcing by integrating API-based job scraping across multiple platforms, enabling real-time job scoring, reducing manual job search effort, and prioritizing high-fit opportunities.

Personal Details

Address : Mumbai, 400615

Date of Birth : 26th January, 1999

Languages Known : English, Hindi, Marathi
